Acknowledgement

This project is a contribution of knowledge and hard work of both students and tutorial. The ideas that create the website are the effort of each team member with the involvement of the instructors. Therefore, we really appreciate the help of friends and teachers at Fpt Aptech Academy. We would like to express our deep gratitude and sincere thanks to everyone who supported, encouraged and commented on us so we can successfully implement this project.

First of all, we are grateful to Ms Thuy who guided, analyzed project's requirements and show us how to solve problems which we have not yet learned. She enthusiastically helped us when we made coding mistakes and encouraged us complete the project well. Secondly, we thank our previous classmates for the excellent completion of other projects such as implementing the website about the bridge, the phone company, the web selling cars ... Thanks to these data by which we have references to make our website more creative and learn some benefits of site layout.

Finally, we also show appreciation to our hard work members of the team, who listened to their suggestions and improved their way of working so that the interaction and coordination among the members worked quickly, fast and efficient.

Synopsis

Home Wildlife is a website that provides information on all the animals of the largest zoo central in Ho Chi Minh city. Through the website, users can find out information about the history and location of the Central Zoo as well as knowledge about all animal classifications and species that stored and exhibited in the park. In addition, students or businesses can organize events or plant to do team-building for entertainment through the site's reservation system. Moreover, clients can register as a member of the Home Wildlife to get many incentives and up-to-date the newest information on news about conservation animals, precious animals that the whole world consider. After visiting the park and the animals, visitors can also contribute or share their ideas to the development of the Central Zoo through the customer feedback section on the site.

Problem Statement

According to the project specifications, we had specific ideas to set up a website to meet the requirements of the project. However, each member has a different idea. Through many conversations and discussions, we have agreed on a common direction to create a lively and engaging website. The more we refer, the more we realize some of the challenges that need to be addressed, such as:

- How many headings are there?
- How to position the toolbars as appropriate?
- How to create a live homepage that attracts viewers?
- Does the color presented for the item reflect the view?
- Detailed information presented on which menu to reasonably?
- Do members agree on a viewpoint about work arrangement?

Moreover, the website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Customer requirement specification

Client: FPT_Aptech

Business / Project objective:

- Provide the information about all the animals (like species, animal classification) which are kept and along with their image.
- The Home Page should be created making use of Sections with a suitable logo
- The look and feel of the project must be made user friendly and uniformity in the color combination must be maintained.
- About us, Contact us (address and map) must be added, it's location displayed using GeoLocation API on the map
- Animal's information can be added in the categorized like birds, animals, water animals and so on.
- Safari option is there for which dummy booking option can be added
- Gallery of animals and birds must be added in the website.
- Timings of the zoo must be added
- Navigation of the project must be made smooth.

-
- Events organized (Informative for audience and for the welfare of the animals) must be noted.
 - Feedback and query can be added in the website.

Input to the system:

From Webmaster:

- + Information about all the animals such as species, mammals, water animals , rodents....
- + Location of the Central Zoo, trading hour of the park.
- + A brief introduce web creators
- + Contact information and provide support email, phone number
- + News about the animals and maintenance notice.
- + Upcoming Events

From website visitors:

- + Find out information about animals that are staying at the park.
- + Register member
- + Manage their account
- + Buy tickets online
- + Book a space for event.
- + Visitor's feedback

Output from the system:

- + Detailed information about the animals as well as illustrated pictures
- + Search results.
- + Location of the Central Zoo will be displayed on a map.

Hardware/ Software Requirements

Hardware

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Software

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

Scope of the work (in brief)

After having agreed upon the opinions of all team members, we came up with some important parts of the project to be implemented:

1. Navigation bar have 2 sections: the main menu and the sub menu
2. The home background will be lived.
3. The wilder vision consists 3 sections: animals, water animals and birds.
4. Contact Us includes the address, map and feedback
5. About us provides the information of the central zoo
6. Privacy Policy will be mentioned the rules when visiting the park, the law prohibits to protect animals
7. Showing the news which collected from online newspapers about animals.
8. Present the upcoming events
9. Display the comments of customer's feedback.

Website Description

1. Home Page

a) Description

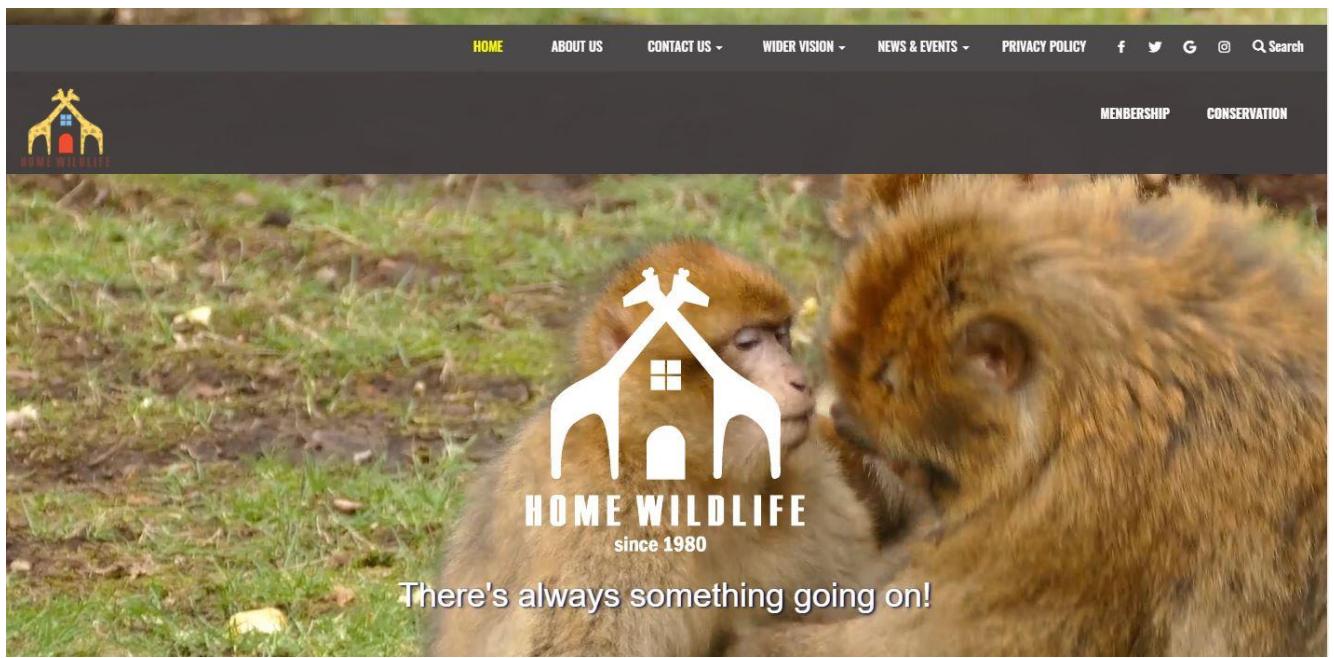

First of all, “HomeWildlife” index pages would be briefly present our greetings to the visitors. We have added a animal video on the banner to make the homepage more lively. It certainly has a main menu bar which includes the links pages such as: about us, contact us, wilder vision, news and events, privacy policy. A few icons used to connect to our social networking site are also placed next to the main tab of the menu. A search engine that can help clients use keywords that find information throughout our linked pages.

Moreover, we have extra a sub menu by which a client can register member or log in into their member’s accounts. They also can buy a ticket online or booking a space for camping by go through the conservation menu. Some

According to our home pages, the audiences can glance at upcoming events, categories and special photos. If interested, visitors can select the favorite to learn more details. We also show the map among that list for easily find out where we are stated. Our future plans would be mentioned in the end of the home body page.

Finally, the footer would be demonstrated the Home Wildlife’s location by which you can see the detail of our address and when we will open as well as our trading hours.

Future zoo plans

For 29 years, the Home wildlife County Zoo has worked to provide unforgettable experiences for our community, innovative and healthy habitats for animals, and conservation of species for future generations to be inspired. Now, GS is looking toward the future to determine what the Zoo will look like over the next 25 years. Your future Zoo will be a major multi-day destination and will include additional entertainment and venue options, opportunities for education-based play, and beautiful new habitats for the animals currently living at SCZ. The Zoo will continue to connect visitors with animals – teaching them how the Zoo cares for wildlife here and around the world, and inspire them to participate in positive conservation solutions at home.

2. About us

a) Description

This page would be introduced to the “HomeWildlife” central zoo. The history of the park and its founding members as well as the creators of entire website.

b) Screenshot

Welcome to Our Home Wildlife

There's a brief introduction about the zoo.

The home wildlife (also known as The Zoological Park and Gardens) is the largest and oldest zoological garden in Viet Nam and the amazing zoo in Sai Gon.

The unique climate in Sai Gon allows us to keep a wide variety of animals from Asia, Australia, and Africa, representing a broad mix of species that is unlike any other zoo in the country.

The land area of the zoo is 33 acres.

The Home Wildlife was established in the year 1980 with 10 acre land but lately it was modified and land area was also added in the year 2000.

Proper residing space for all the type of animals has been made and maintains human security at high rate. Proper supply of food for all the animals is maintains and checked at regular intervals.

VISITOR TESTIMONIALS

TELL US WHAT YOU THINK

Jan B

★★★★★

OMG!! One of my favorite experiences EVER!! Not a "zoo"— it's a paradise! I highly recommend paying the \$\$ to get the "caddy tour" if you're not up to walking a lot— it's a huge property! We had a darling, knowledgeable guide who took us EVERYWHERE

GrandmaBB1

★★★★☆

Arrived not long after opening and didn't have to line up to get in. Staff were friendly and knowledgeable. Well worth the visit, after years of wanting to visit, we finally had the chance to and we were not disappointed. It is very big and its just so well designed for the beautiful animals they have there.

Rattlesnake

Rattlesnake Facts: Rattlesnakes are a group of venomous snakes of the genera *Crotalus* and *Sistrurus*[1] of the subfamily *Crotalinae* (the pit vipers). The scientific name *Crotalus* is derived from the Greek κρόταλον, meaning "castanet". Rattlesnakes receive their name from the rattle located at the end of their tails, which makes a loud rattling noise when vibrated that deters predators or serves as a warning to passers-by.

Range and habitat: Rattlesnakes are native to the Americas, living in diverse habitats from southwestern Canada to central Argentina. The large majority of species lives in the American Southwest and Mexico. Four species may be found east of the Mississippi River, and two in South America. Rattlesnakes are found in almost every type of habitat capable of supporting terrestrial ectothermic vertebrates, but individual species can have extremely specific habitat requirements, only able to live within certain plant associations in a narrow range of altitudes.

Hydration: Rattlesnakes are believed to require at least their own body weight in water annually to remain hydrated. The method in which they drink depends on the water source. In larger bodies of water (streams, ponds, etc.), they submerge their heads and ingest water by opening and closing their jaws, which sucks in water. If drinking dew, or drinking from small puddles, they sip the liquid either by capillary action or by flattening and flooding their lower jaws.

Living: Rattlesnakes are predators that live in a wide array of habitats, hunting small animals such as birds and rodents.

Reproduction: Most rattlesnake species mate during the summer or fall, while some species mate only in the spring, or during both the spring and fall.

Conservation status: Rattlesnakes tend to avoid developed areas, preferring undisturbed, natural habitats. Rapid habitat destruction by humans, mass killings during events such as rattlesnake round-ups, and deliberate extermination campaigns all pose threats to rattlesnake populations in many areas. Several species of rattlesnakes, such as the timber rattlesnake, massasauga, and canebrake rattlesnake, are listed as threatened or endangered in many U.S. states.

5. News & Events

a) Description

This page allows users have more information about the new events. The upcoming events currently are planning with Halloween festival, the visit tour for teachers and students and Christmas public holidays. We also provide some news about animals' protection, the global wildlife trade from the other webpage.

b) Screenshot

NewsEvents 1

Upcoming Events

There's always something great going on!

Happy Halloween

All October, the Galloping Grace Ranch's annual pumpkin patch is a local favorite that features a corn pit, harvest maze, scarecrow dress up, tractor races, roping, pumpkin bowling, and many more games and activities. This annual event is the biggest fundraiser for Galloping Grace, whose youth leadership and agricultural education programs offer kids a chance to get involved in raising livestock, growing crops, and exploring the outdoors.

Education @ the HomeWildlife

Typical topics are often selected by primary teachers for their students:

- We protect the environment together
- Habitat of plants and animals
- The champions in the animal world
- Wild animal food

NewsEvents 2

Christmas Event

Animal Care/ Christmas Fair

11am to 3pm/ 8th December 2019 -> @HomeWildlife Center Hall

Lots of stalls, books, clothes, crafts and jewellery.

Also refreshments

Come and find a bargain and also help your local animal rehoming centre!
